

SHASHANK S J

Full Stack Developer | Java · ReactJS · Spring Boot · Cloud & DevOps

shashanksj6247@gmail.com — +91-97419-91065 — Bengaluru, India — [linkedin.com/in/shashank-s-j-sasalu](https://www.linkedin.com/in/shashank-s-j-sasalu) — github.com/ShashankSJ1

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2 years of experience building scalable Java/Spring Boot backend systems and ReactJS frontend applications — delivering enterprise-grade web applications using HTML5, CSS3, JavaScript (ES6+), and RESTful APIs with a focus on debugging, unit testing, and browser testing.

Hands-on with Microservices architecture, Docker, Kubernetes, AWS, Azure, and Azure DevOps CI/CD pipelines — contributing to production systems that process 10,000+ records daily at 99.9% uptime with a 95% deployment success rate.

Strong in PostgreSQL/SQL Server database development, unit testing (85%+ coverage), performance monitoring, and cross-functional Agile/Scrum collaboration; OCI 2025 Certified Generative AI Professional.

CORE COMPETENCIES

Frontend	ReactJS JavaScript (ES6+) HTML5 CSS3 Node.js Redux TypeScript Unit Testing Browser Testing & Debugging
Backend & Java	Java JEE Spring Boot Spring MVC Spring Security Microservices REST APIs Hibernate JPA Apache Camel
Cloud & DevOps	AWS (EC2, S3, EKS, Lambda) Azure Azure DevOps Docker Kubernetes CI/CD Pipelines Jenkins GitHub Actions IaC
Database & Quality	PostgreSQL MySQL SQL Server Redis SQL Optimisation JUnit Mockito OpenAPI/Swagger Performance Monitoring Agile/Scrum

WORK EXPERIENCE

Happiest Minds Technologies

Aug 2024 – Present

Full Stack Developer – Java & ReactJS

Bengaluru, India

- Worked on full stack enterprise web application development using Java/Spring Boot backend APIs and ReactJS frontend — building HTML5/CSS3/JavaScript (ES6+) UI components with Redux state management, delivering a responsive web interface for 100+ active clinical users with cross-browser testing and debugging.
- Contributed to Java/JEE Microservices backend development using Spring Boot and Apache Camel — implemented RESTful APIs for data processing pipelines handling 10,000+ records daily on AWS at 99.9% uptime, with Hibernate/JPA data access and optimised PostgreSQL/SQL queries.
- Contributed to CI/CD pipelines using Azure DevOps and Jenkins with Docker and Kubernetes on AWS EKS — achieving a 95% deployment success rate and 60% reduction in deployment time through automated build, test, and deployment workflows across cloud environments.
- Applied unit testing using JUnit and Mockito (85%+ coverage); performed debugging and browser testing across environments; implemented performance monitoring and structured logging — reducing MTTR by 45% through systematic log analysis and incident triage across 8+ Agile/Scrum sprint cycles.
- Worked with PostgreSQL and SQL Server databases — implemented optimised SQL queries, Redis caching (cutting API response times by 40%), and maintained OpenAPI/Swagger technical documentation for all RESTful API endpoints.

Happiest Minds Technologies

May 2024 – Aug 2024

Engineer Trainee – Full Stack Development

Bengaluru, India

- Progressed to Full Stack Developer within 3 months; contributed to Java/Spring Boot REST API development, Hibernate/JPA backend layers, ReactJS frontend modules, and unit testing — building full stack web application skills across HTML, CSS, JavaScript, and Java.

KEY PROJECTS

Happiest Health – Enterprise Web Application & Integration Platform

Java · Spring Boot · Apache Camel · ReactJS · AWS EKS ·

PostgreSQL · Docker

May 2024 – Present

- Worked as backend developer on an end-to-end enterprise web application — built Spring Boot Microservices for data transformation pipelines, ReactJS monitoring dashboards (HTML/CSS/JS), and RESTful Integration APIs connecting third-party ERP systems; deployed on AWS EKS with Kubernetes handling 15,000+ records/hour, reducing integration costs by 70%.

InvestConnect – Full Stack B2B Web Platform

Spring Boot · ReactJS · HTML5 · CSS3 · Node.js · Azure · PostgreSQL · JWT

Nov 2024 – Mar 2025

- Built a full stack B2B web platform — Java/Spring Boot backend with JWT/OAuth 2.0 RBAC, ReactJS/HTML5/CSS3 frontend with Node.js tooling, Azure cloud integration for event-driven notifications and Blob Store document workflows; maintained OpenAPI/Swagger documentation for all Webservice endpoints.

EDUCATION

Malnad College of Engineering (VTU), Hassan

2019 – 2023

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional <i>Generative AI · OCI AI Services · LLMs · Retrieval-Augmented Generation (RAG) · Responsible AI</i>	<i>Issued Oct 2025 · Expires Oct 2027</i>
Java Full Stack Development with AWS – Happiest Minds / StackRoute (NIIT) <i>Spring Boot · Microservices · ReactJS · AWS · Azure DevOps · CI/CD · Unit Testing · PostgreSQL</i>	<i>Nov 2024</i>
